

News Bulletin Production 190623

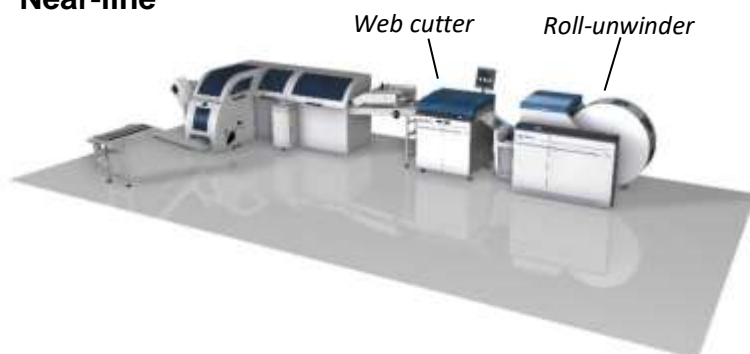

The IBIS Smart-binder is frequently used to produce news bulletins for distribution at regular intervals.

Examples of News Bulletin production lines

In-line

Near-line

Off-line

IBIS Smart-binders are used for news bulletin production for the following reasons:

1/ Production time sensitivity

Bulletins, such as those handed out to a church congregation every Sunday, must be printed, finished and distributed very quickly after the print files are created.

This speed requirement ideally suits digital printing in combination with an in-line, or near line IBIS Smart-binder to convert printed sheets into finished booklets.

IBIS Innovation: Moving you ahead

IBIS Integrated Bindery Systems Limited, 9 The Gateway Centre, Coronation Road, Cressex Business Park, High Wycombe, HP12 3SU, UK. Tel.: +44 (0) 1494 561950 Fax: +44 (0) 1494 561951

Email: info@ibis-bindery.com

Company registered in England, number 03703149. UK VAT Registration number 697 9379 42.

2/ Reliable operation with minimum maintenance and 24/7 operation

Because bulletins must often be produced to a certain time deadline, it is important that the equipment producing these can run reliably around the clock with minimum downtime for repair or maintenance. The Smart-binder ideally suits this type of production requirement.

3/ Ability to change the number of pages on-the-run

Although production volumes may be high, jobs may need to change frequently. The Smart-binder allows the number pages change between one job and the next **without stopping**, under bar-code control.

Example customer installations in the USA

Our customers below are using the IBIS Smart-binder to produce weekly news bulletins that are distributed to church congregations every Sunday:

1: Customer 'XYZ' in the USA (name withheld for confidentiality)

This customer has installed 9 IBIS Smart-binders over the last 10 years at different locations throughout the USA in order to produce weekly 8 ½ x 11" Church Bulletins. These machines are each fed from a Tecnaun roll unwinder and web cutter. Some these SBs include dynamic perforation to allow for sheet tear-out.

2: Trinity USA

During the last year Trinity have installed multiple Smart-binders at different sites in the USA to produce Church Bulletins. Some of these machines were supplied by IBIS/Best Graphics as 'used/refurbished'

3 Bon Venture USA

Bon Venture installed one IBIS Smart-binder in 2019 to produce Church Bulletins. This machine is fed from a Tecnaun roll unwinder and web cutter.
