

Data Sheet: Optional 100 kg wire spools/holders HKS-100 & trolley WST-100

To reduce the frequency of replacing wire spools, and to reduce wire 'pulling' force, it is recommended that 100 KG floor mounted wire spools are used instead of the standard 2.5 Kg machine-mounted spools:

Wire spool holder with brush to resist wire unwinding.

100Kg wire spool (mounted on floor behind Smart-binder).

The optional Wire Spool handling trolley is also offered for use with 100Kg wire spools in order to move the spools into position next to the Smart-binder stitcher.

Hydraulic lifting 'jack'

WST-100 loading trolley

100Kg wire spool

Trolley Wheels

The trolley includes a hydraulic jack to lift the spools.

Wheels allow easy movement around the factory floor.
